Credit Name: CSE 2110 Procedural Programming 1

Assignment Name: Chapter 5 Mastery Exercise 14 (DiceRolls)

Error Log Entry

What error message did you encounter (if any)?

I didn't encounter any

What unexpected behavior did your program exhibit?

When I tried to display each dice roll and then the sum, it just added them all together and displayed that value.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

Logic error due to a lack of quotations

Include a screenshot of specific lines of code.

```
38          System.out.println("Dice 1   Dice 2   Total");
39          System.out.println(roll1   + roll2  +  sum1);
40          System.out.println(roll3   + roll4  +  sum2);
41          System.out.println(roll5   + roll6  +  sum3);
42          System.out.println(roll7   + roll8  +  sum4);
43          System.out.println(roll9   + roll10  + sum5);
44          System.out.println(roll11  + roll12  + sum6);
```

How did you fix the issue?

I included quotations between the variables to add spaces between the values and to stop them from being added together.

Provide the corrected code or solution using a screenshot.

```
46          //Display the five pairs of dice rolls and then the sum of each pair
47          System.out.println("Dice 1   Dice 2   Total");
48          System.out.println("   "+roll1+"        "+roll2+"       "+sum1);
49          System.out.println("   "+roll3+"        "+roll4+"       "+sum2);
50          System.out.println("   "+roll5+"        "+roll6+"       "+sum3);
51          System.out.println("   "+roll7+"        "+roll8+"       "+sum4);
52          System.out.println("   "+roll9+"        "+roll10+"       "+sum5);
```
